Shuffle
AUTOMATE WITH
CONFIDENCE.

Shuffle

TRUST IN SHUFFLE

While current automation solutions try to do everything at once (handle tickets, indicators, threat intel, etc), we focus on building the best solution following the Unix philosophy: **"Do One Thing and Do It Well"**. And we are Open Source.

10+ GOVERNMENTS

automate and manage their security infrastructure with Shuffle.

25+ INDUSTRIES

including cybersecurity, Information Tech. (IT) and Operational Tech. (OT).

130+ COUNTRIES

have users and companies that use Shuffle to support their security operations.

9000+ COMPANIES

secure and automate their workload aross Shuffle Cloud and onPrem.

BUILT FOR **EVERYONE** WITH **TRUST**, AND **FLEXIBILITY**.

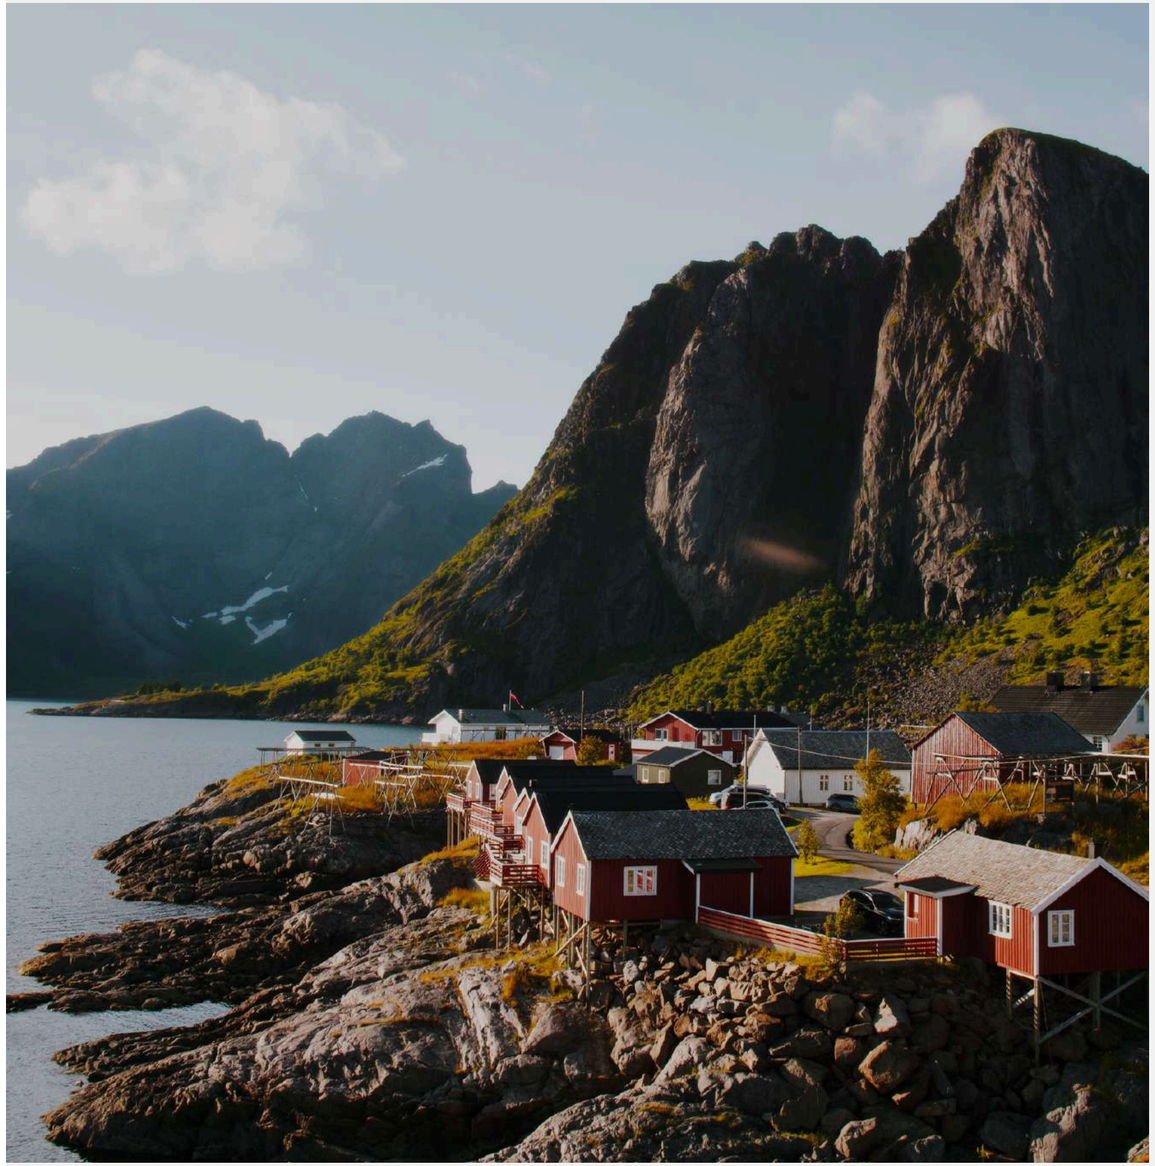
SHUFFLE FEATURES

Shuffle is the most feature-packed platform on the market, in part because we are our own end users.

Yes, Shuffle runs on Shuffle.

Let’s dive into why and how you can literally **automate anything on Shuffle.**



STATE OF THE ART
WORKFLOW BUILDER

- Triggers: Webhooks, Schedules, Subflows, User Input
- App Authentication and App Actions
- Inbuilt Code Editor and Code Runner
- Script Executions: Python, Bash
- Autocomplete Functionality
- Loops and Nested Loops
- Workflow History and Workflow Run History
- Variables and Liquid Formatting
- Nodes and Conditions
- HTTP and Rest APIs
- JSON Autocompletion
- Deduplication
- Shuffle File storage
- Shuffle Datastore (Cache)
- Export and Import Functionality

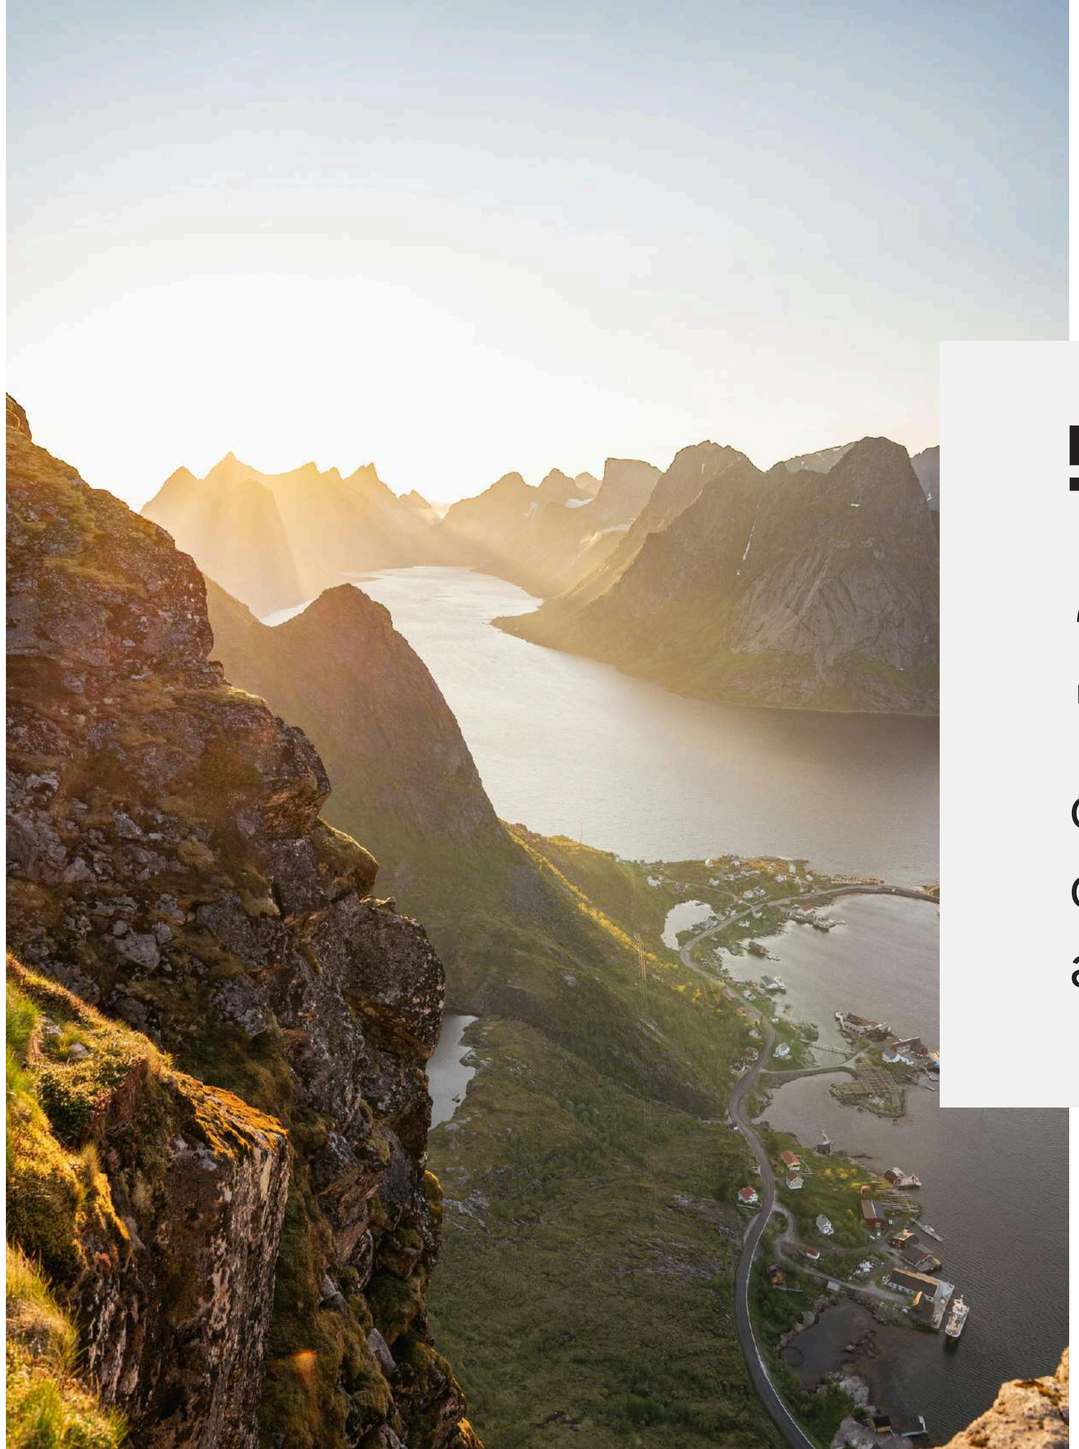
STATE OF THE ART
APPS AND APP BUILDER

Shuffle Apps – Prebuilt:

- Also known as Integrations / Connectors / Tools / Platforms
- Built on the OpenAPI standard
- Come with prebuilt ‘actions’
- Largest library of apps in the industry

Shuffle App Builder – Custom:

- Three options to build apps *in minutes*:
  - OpenAPI and Swagger Standard
  - Documentation-to-App Builder (AI Beta)
  - Build-from-Scratch
- Covers:
  - Authentication
  - Actions
  - Description and Docs



Shuffle has

2500+ Apps

covering SIEM, EDR, threat intel,
case management, networking,
asset management, IT, & OT.

WORKFLOW AND APP RESOURCES

Workflows:

- Builder: shuffler.io/workflows
- Usecases: shuffler.io/usecases

Apps:

- Builder: shuffler.io/apps
- App Search: shuffler.io/search

COMPLETE* FEATURE LIST

- Multi-Tenancy (Link)
- Multi-Location (Link)
- High Availability and High Scalability (Link)
- User Management with RBA (Link)
- File Storage and Management (Link)
- Key Value Store (Link)
- Encrypted Authentication Storage (Link)
- Triggers Management (Link)
- Data Pipelines (Link)
- SSO/SAML and MFA (Link)
- KMS Connectivity (Link)
- Workflow Debugger (Link)
- Shuffle Forms (Link)
- Feature Limit and Control (Link)
- Statistics and Billing (Link)
- Built-in Documentation (Link)
- Shuffle Extensions (Link)

* We keep adding new features all the time.

COMPLETE* FEATURE LIST

- Hybrid and Cloud Sync (Link)
- Integration with LLMs (Link)
- AI Agents (Link)
- AI Workflow Generation (Link) (Cloud)
- AI App Generation (Link) (Cloud)
- Data Center / Service Region Selection (Link) (Cloud)
- Encryption (Link)
- Shuffle Tools (Link)
- Notifications (Link)
- Account and Settings (Link)
- Partner Profile Manager (Link)
- Partner Branding Management (Whitelabeling) (Link)
- App Explorer (Link) (Click on any app)
- App API Explorer (Link) (Click on any app → Click on ‘Try the API’)
- Shuffle API (Link) (Workflows, Apps, Stats, User, Datastore, Triggers, Orgs...)

* We keep adding new features all the time.

SHUFFLE DIFFERENTIATION

Get everything other platforms offer:

- Prebuilt Workflows (Usecases / Playbooks / Templates)
- Prebuilt Apps (Integrations / Connectors / Tools / Platforms)
- All Architecture and Deployment Options
- All Features
- AI Agents

Plus, get the highest level of customizations and controls possible:

- Custom Workflows
- Custom Apps
- Custom Scripts
- Custom Architecture and Deployment Options
- Custom AI Agents (with Context and Memory)
- Custom Extension, Triggers, Notifications
- Custom Data Management, Data Pipelines, and more.

With Shuffle: “Can we do this?” turns into “How do we do this?”

OPEN SOURCE AND ENTERPRISE

	Open Source	Enterprise
All Features	✓	✓
Tenants	3	∞
Locations / Environments	1	∞
Parallel + High Scale Workflow Runs	10k	∞
High Scalability Orborus	X	✓
High Availability Orborus	X	✓
Branding and Customizations	X	✓
Onboarding and Setup	X	✓
Shuffle Support	X	✓

Also, we’ve been building and researching about the future of AI Agents before chatGPT was a thing.
